

90 Degree Turn

As you approach a 90 Degree Turn ladder bridge, maintain good momentum, keep yourself balanced, and look ahead.

When you round the turn, keep your bike centered on the ladder. Try to avoid letting your rear tire fall to the inside of the turn. Because this turn is not bermed, avoid leaning too much to the inside while turning.

Rider tip: Look ahead and anticipate upcoming obstacles

Please allow riders ahead of you time to clear the ladder before beginning your run. Only one rider at a time.

Know your limits and ride responsibly!
